CRAFTS
IN HARMONY
WITH NATURE

Natural materials

For the production of NIRE armchairs, we choose only the highest grade wood with the appropriate colour and texture, as well as environmentally friendly, ecological water-based varnishes.

Timeless design

Thanks to its harmonious lines and the beauty of natural wood The NIRE armchair looks good in any space. Both for traditional and modern style interiors.

Traditional and modern style

Tradition craftsmanship NIRE armchairs are produced by experienced artisans from the Polish Carpentry Studio 'Dawidczyk'. They take care of precision artistry and every detail from the first cuts in the material.

Individual style

The work of human hands can give objects their style and character, which is why each NIRE chair is assembled by hand. As a result, it retains that particular something, which we call "human touch".

NATURALLY VERIFIED ENERGY

NIRJE

TECHNOLOGY THAT SERVES HEALTH

Zero Gravity Position

The ergonomic shape of the chair keeps the body in position zero gravity, as defined by NASA specialists. It ensures the optimal and most favorable arrangement whole body. Guarantees the best sleep and relaxation. It relieves pressure on the spine, relaxes muscles, opens the airways and relieves stress on the heart.

Safety use

The high quality of armchairs NIRE is confirmed by a set of certifications that allow them to be marketed: B, CE and ISO 9001:2015-10.

FOR BEAUTY

Rest and relaxation

Working long hours every day, tension and stress makes us tired. Problems with concentration and sleep occur. The NIRE chair, thanks to infrared heat, reduces nervous excitability, relieves tiredness and allows the body and mind to enter a state of deep relaxation.

Improve skin quality

Our skin has a significant protective and thermal function. When you use the NIRE chair, you are affecting on it holistically, not just locally. The skin becomes firm, taut and smooth. Therapy far-infrared heat is exceptionally effective in fighting or reducing cellulite.

Concern for the environment

NIRE armchairs are highly energy efficient. At 24 volts, their average heating power is approx. 100 W. This means that one NIRE chair consumes 40 times less electricity than a small sauna for two people.

Perfect silhouette

Deep infrared heat strengthens the strength of our muscular system. It helps us maintain and preserve our posture.

FOR HEALTH

Strengthening immunity

Far infrared heat helps to maintain a constant body temperature. This positively influences the activity of white blood cells and other substances, which strengthen the body's resistance from within.

Better metabolism

Using the NIRE chair supports metabolism and facilitates the removal of toxins and impurities from the body. A single treatment can be as effective as a half-hour jog.

Pain relief

The soothing heat emitted by far-infrared light relaxes and relieves muscle tension. Muscle tension. It naturally relieves pain, supports the healing of injuries and has an anti-inflammatory effect.

Natural Infrared Energy

The operation of NIRE seen through the eye of a thermal camera (infrared).
